Ethanol Assay Kit

Catalog Number: EK0278

Product Size: 1 KT

Price: Online Inquiry

Product Information	
Storage Temperature	−20°C
Shipping Conditions	Gel ice pack.
Detection Method	Colorimetric or fluorometric.
Usage	Sufficient for 100 colorimetric or fluorometric tests.
Description	Ethanol, a simple alcohol, can act as a central nervous system depressant in many commonly consumed drinks. It also has medical applications and is commonly consumed as a popular recreational drug. Ethanol Assay Kit can be used to measure the level of ethanol in various biological samples, such as serum, plasma, and other body fluids.
