Gene Information	
Gene Official Full Name	zinc finger protein 274provided by HGNC
Also known as	ZF2; HFB101; ZSCAN51; ZKSCAN19
Gene Description	This gene encodes a zinc finger protein containing five C2H2-type zinc finger domains, one or two Kruppel-associated box A (KRAB A) domains, and a leucine-rich domain. The encoded protein has been suggested to be a transcriptional repressor. It localizes predominantly to the nucleolus. Alternatively spliced transcript variants encoding different isoforms exist. These variants utilize alternative polyadenylation signals. [provided by RefSeq, Jul 2008]
Expression	Ubiquitous expression in thyroid (RPKM 9.7), ovary (RPKM 7.7) and 25 other tissues See more
