Gene Information	
Gene Official Full Name	ceramide transporter 1provided by HGNC
Also known as	CERT; GPBP; CERTL; MRD34; NEDHSF; STARD11; COL4A3BP
Gene Description	This gene encodes a kinase that specifically phosphorylates the N-terminal region of the non-collagenous domain of the alpha 3 chain of type IV collagen, known as the Goodpasture antigen. Goodpasture disease is the result of an autoimmune response directed at this antigen. One isoform of this protein is also involved in ceramide intracellular transport. Three transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2008]
Expression	Ubiquitous expression in thyroid (RPKM 18.3), fat (RPKM 18.1) and 25 other tissues See more
