Gene Information	
Gene Official Full Name	transmembrane protein 59provided by HGNC
Also known as	DCF1; C1orf8; PRO195; UNQ169; HSPC001
Gene Description	This gene encodes a protein shown to regulate autophagy in response to bacterial infection. This protein may also regulate the retention of amyloid precursor protein (APP) in the Golgi apparatus through its control of APP glycosylation. Overexpression of this protein has been found to promote apoptosis in a glioma cell line. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Feb 2015]
Expression	Ubiquitous expression in colon (RPKM 47.8), prostate (RPKM 39.1) and 25 other tissues See more
