

## HMG20A Knockout cell line (TPC-1)

**Catalog Number:** KOA57857

| Product Information        |  |
|----------------------------|--|
| Product Name               | HMG20A Knockout cell line (TPC-1)  |
| specification              | 1*10 <sup>6</sup>  |
| Storage and transportation | Shipped on dry ice; Store in liquid nitrogen   |
| Cell morphology            | Epithelial-like, adherent  |
| Passage ratio              | 1:5-1:8  |
| species                    | Human  |
| Gene                       | HMG20A   |
| Gene ID                    | 10363  |
| Build method               | Electroporation/Lentivirus   |
| Mycoplasma testing         | negative   |
| Cultivation system         | 90%DMEM+10%FBS   |
| Price (USD)                | Inquiry  |
| Parental Cell Line         | TPC-1  |
| Quality Control            | Genotype: HMG20A Knockout cell line (TPC-1)>95% viability before freezing. All cells were tested and found to be free of bacterial, viruses,mycoplasma and other toxins. |

| Gene Information        |   |
|-------------------------|---|
| Gene Official Full Name | high mobility group 20Aprovided by HGNC   |
| Also known as           | HMGX1; HMGXB1   |
| Gene Description        | Enables identical protein binding activity. Predicted to be involved in regulation of gene expression. Predicted to act upstream of or within negative regulation of neuron differentiation; negative regulation of protein sumoylation; and negative regulation of transcription by RNA polymerase II. Predicted to be active in nucleus. [provided by Alliance of Genome Resources, Apr 2025] |
| Expression              | Ubiquitous expression in spleen (RPKM 13.0), testis (RPKM 10.4) and 25 other tissues See more   |
