Gene Information	
Gene Official Full Name	TEA domain transcription factor 1provided by HGNC
Also known as	AA; REF1; TCF13; TEF-1; NTEF-1; TCF-13; TEAD-1
Gene Description	This gene encodes a ubiquitous transcriptional enhancer factor that is a member of the TEA/ATTS domain family. This protein directs the transactivation of a wide variety of genes and, in placental cells, also acts as a transcriptional repressor. Mutations in this gene cause Sveinsson's chorioretinal atrophy. Additional transcript variants have been described but their full-length natures have not been experimentally verified. [provided by RefSeq, May 2010]
Expression	Ubiquitous expression in fat (RPKM 17.6), esophagus (RPKM 16.7) and 24 other tissues See more
