Gene Information	
Gene Official Full Name	immediate early response 5provided by HGNC
Also known as	SBBI48
Gene Description	This gene encodes a protein that is similar to other immediate early response proteins. In the mouse, a similar gene may play an important role in mediating the cellular response to mitogenic signals. Studies in rats found the expression of a similar gene to be increased after waking and sleep deprivation. [provided by RefSeq, Jul 2008]
