Gene Information	
Gene Official Full Name	peroxisomal biogenesis factor 16provided by HGNC
Also known as	PBD8A; PBD8B
Gene Description	The protein encoded by this gene is an integral peroxisomal membrane protein. An inactivating nonsense mutation localized to this gene was observed in a patient with Zellweger syndrome of the complementation group CGD/CG9. Expression of this gene product morphologically and biochemically restores the formation of new peroxisomes, suggesting a role in peroxisome organization and biogenesis. Alternative splicing has been observed for this gene and two variants have been described. [provided by RefSeq, Jul 2008]
Expression	Ubiquitous expression in testis (RPKM 7.9), spleen (RPKM 6.6) and 25 other tissues See more
