Product Information	
Product Name	CD Mouse/Rat C-Peptide Antibody Set (1 Plate Size)
Description	The CD platform offers validated components that can be combined to create high quality assays quickly and easily. The CD Mouse/Rat C-Peptide Antibody Set is a matched pair of antibodies that can be used (with other CD components such as plates, calibrators, diluents, and MSD GOLD Read Buffer B) to build CD assays that measure C-Peptide. These assays can measure C-Peptide alone or in multiplex panels with other biomarkers. The Product Inserts in the “Documentation” tab (below) provide detailed instructions for building assays with CD Antibody Sets. For information on multiplexing C-Peptide with other analytes, please see Metabolic Group 1 Mouse Assays or Metabolic Group 1 Rat Assays.
