### Product Information

Product Name	CD Human PD-L1 (epitope 1) Antibody Set
Description	The CD platform offers validated components that can be combined to create high quality assays quickly and easily. The CD PD-L1 (epitope 1) Antibody Set is a matched pair of antibodies that can be used (with other CD components such as plates, calibrators, diluents, and MSD GOLD Read Buffer B) to build CD assays that measure PD-L1 (epitope 1). These assays can measure PD-L1 (epitope 1) alone or in multiplex panels with other biomarkers. The Product Inserts in the “Documentation” tab (below) provide detailed instructions for building assays with CD Antibody Sets. For information on multiplexing PD-L1 (epitope 1) with other analytes, please see Immuno-Oncology Group 1 Human Assays.
