Product Information	
Product Name	CD Human Eotaxin-3 Antibody Set
Description	The CD platform offers validated components that can be combined to create high quality assays quickly and easily. The CD Human Eotaxin-3 Antibody Set is a matched pair of antibodies that can be used (with other CD components such as plates, calibrators, diluents, and MSD GOLD Read Buffer B) to build CD assays that measure Eotaxin-3. These assays can measure Eotaxin-3 alone or in multiplex panels with other biomarkers. The Product Inserts in the “Documentation” tab (below) provide detailed instructions for building assays with CD Antibody Sets. For information on multiplexing Eotaxin-3 with other analytes, please see CD Biomarker Group 1 (hu) Assays, CD Metabolic Group 1 (hu) Assays, or CD Immuno-Oncology Group 1 (hu) Assays.
