Product Information	
Product Name	CD Mouse IL-17C Antibody Set
Description	The CD platform offers validated components that can be combined to create high quality assays quickly and easily. The CD Mouse IL-17C Antibody Set is a matched pair of antibodies that can be used (with other CD components such as plates, calibrators, diluents, and MSD GOLD Read Buffer B) to build CD assays that measure IL-17C. These assays can measure IL-17C alone or in multiplex panels with other biomarkers. The Product Inserts in the “Documentation” tab (below) provide detailed instructions for building assays with CD Antibody Sets. For information on multiplexing IL-17C with other analytes, please see CD Biomarker Group 1 or Metabolic Group 1 Mouse Assays.
