Product Information	
Product Name	CD Mouse EPO Antibody Set
Description	The CD platform offers validated components that can be combined to create high quality assays quickly and easily. The CD Mouse EPO Antibody Set is a matched pair of antibodies that can be used (with other CD components such as plates, calibrators, diluents, and MSD GOLD Read Buffer B) to build CD assays that measure EPO. These assays can measure EPO alone or in multiplex panels with other biomarkers. The Product Inserts in the “Documentation” tab (below) provide detailed instructions for building assays with CD Antibody Sets. For information on multiplexing EPO with other analytes, please see CD Biomarker Group 1 or Metabolic Group 1 Mouse Assays.
