Product Information	
Product Name	CD Mouse EGF Antibody Set
Description	The CD platform offers matched sets of antibodies and calibrators for a wide menu of biomarkers. The CD Mouse EGF Antibody Set can be used with other MSD components (see "Recommended Components" tab below) to build assays that measure EGF. These assays can measure EGF alone or in multiplex panels with other biomarkers. The Product Inserts for CD Antibody Sets provide detailed instructions for building assays in several formats. The datasheet for EGF provides specific information for the components (including calibrator stock concentration), recommended sample types and dilution factors, and representative data for analytical performance. These items and other helpful documents can be found in the "Documentation" tab below. Related Key TermsHOMG4, URG, Urogastrone
