Description	The CD platform offers matched sets of antibodies and calibrators for a wide menu of biomarkers. The CD Human ADP-ribosyl cyclase Antibody Set can be used with other MSD components (see "Recommended Components" tab below) to build assays that measure ADP-ribosyl cyclase. These assays can measure ADP-ribosyl cyclase alone or in multiplex panels with other biomarkers. The Product Inserts for CD Antibody Sets provide detailed instructions for building assays in several formats. The datasheet for ADP-ribosyl cyclase provides specific information for the components (including calibrator stock concentration), recommended sample types and dilution factors, and representative data for analytical performance.
