

## Dic(Diclazuril) ELISA Kit

**Catalog Number:** FSK0038

**Price:** [Online Inquiry](#)

| Product Information   |                                                          |
|-----------------------|----------------------------------------------------------|
| Product Name          | Dic(Diclazuril) ELISA Kit                                |
| Reactivity            | Universal                                                |
| Sample Type           | Muscle                                                   |
| Analytes              | Quantitative analysis of Diclazuril.                     |
| Reaction Temperature  | 25°C                                                     |
| Assay Time            | 30 min, 15 min                                           |
| LOD (Detection Limit) | Muscle, Eggs-15 ppb                                      |
| Sample Preparation    | Preparation methods are included in the kit description. |
| Instruments           | Spectrophotometer, Microplate, Auto-analyser             |
| Detection Method      | Absorbance                                               |
| Wave length (nm)      | 450 nm/630 nm                                            |
| Detection Range       | See the manual for details                               |
| Storage               | 2-8°C, avoid freeze                                      |
| Expiration Date       | 1 year                                                   |
