

## CD ATPase Assay Kit

**Catalog Number:** AKBA230

**Size:** 200 tests

**Price:** [Online Inquiry](#)

Product Information	
Product Name	CD ATPase Assay Kit
Applications	For quantitative determination of ATPase or GTPase activity and high-throughput screen for their inhibitors.
Features	High sensitivity: detection of 0.007 U/L ATPase or GTPase activity. Fast and convenient: single reagent, homogeneous “mix-and-measure” assay allows quantitation of enzyme activity within 30 minutes. Robust and amenable to HTS: detection at 620nm greatly reduces potential interference by colored compounds. Z factors of >0.7 are observed in 96-well and 384-well plates. Can be readily automated on HTS liquid handling systems.
Detection Method	OD <sub>620nm</sub>
Sample Type	Compounds that affect ATPase/GTPase activity
Species	All
Assay Time	30 min
Limit of Detection	0.007 U/L
Expiration Date	12 months
Description	ATPases and GTPases catalyze the decomposition of ATP or GTP into ADP or GDP and free phosphate ion. These enzymes play key roles in transport, signal transduction, protein biosynthesis and cell differentiation. CD ATPase/GTPase Assay Kit offers a highly sensitive method for determining ATPase/GTPase activities in a microplate format. Its proprietary formulation features a single reagent for accurate determination of enzyme activity in 30 min at room temperature. The improved malachite green reagent forms a stable dark green color with liberated phosphate, which is measured on a plate reader (600 – 660 nm).
Shipping Conditions	Shipping: RT
Storage	Storage: 4°C upon receipt
