

## F2RL3 Knockout cell line □ Huh-7 □

**Catalog Number:** KO00006

Product Information	
Product Name	F2RL3 Knockout cell line ( Huh-7 )
specification	1*10 <sup>6</sup>
Storage and transportation	Dry ice preservation/T25 live cell transportation.
Cell morphology	Epithelioid, adherent cell
Passage ratio	1:2~1:3
species	Human
Gene	F2RL3
Gene ID	9002
Build method	Electric rotation method / virus method
Mycoplasma testing	Negative
Cultivation system	90%DMEM+10% FBS
Parental Cell Line	Huh-7
Quality Control	Genotype: F2RL3 Knockout cell line ( Huh-7 ) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses, mycoplasma and other toxins.

Gene Information	
Gene Official Full Name	F2R like thrombin or trypsin receptor 3provided by HGNC
Also known as	PAR4
Gene Description	This gene encodes a member of the protease-activated receptor subfamily, part of the G-protein coupled receptor 1 family of proteins. The encoded receptor is proteolytically processed to reveal an extracellular N-terminal tethered ligand that binds to and activates the receptor. This receptor plays a role in blood coagulation, inflammation and response to pain. Hypomethylation at this gene may be associated with lung cancer in human patients. [provided by RefSeq, Sep 2016]
Expression	Broad expression in fat (RPKM 1.9), stomach (RPKM 1.3) and 16 other tissues See more
