

NF1 Knockout cell line (U-87 MG)

Catalog Number: KO00087

Product Information	
Product Name	NF1 Knockout cell line (U-87 MG)
specification	1*10 ⁶
Storage and transportation	Dry ice preservation/T25 live cell transportation.
Cell morphology	Epithelioid, adherent cell
Passage ratio	1:3~1:4
species	Human
Gene	NF1
Gene ID	4763
Build method	Electric rotation method / virus method
Mycoplasma testing	Negative
Cultivation system	90%DMEM+10% FBS
Parental Cell Line	U-87 MG
Quality Control	Genotype: NF1 Knockout cell line (U-87 MG) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses, mycoplasma and other toxins.

Gene Information	
Gene Official Full Name	neurofibromin 1provided by HGNC
Also known as	WSS; NFNS; VRNF
Gene Description	This gene product appears to function as a negative regulator of the ras signal transduction pathway. Mutations in this gene have been linked to neurofibromatosis type 1, juvenile myelomonocytic leukemia and Watson syndrome. The mRNA for this gene is subject to RNA editing (CGA>UGA->Arg1306Term) resulting in premature translation termination. Alternatively spliced transcript variants encoding different isoforms have also been described for this gene. [provided by RefSeq, Jul 2008]
Expression	Ubiquitous expression in thyroid (RPKM 9.3), brain (RPKM 8.2) and 25 other tissues See more
