

## KHDRBS1 knockout cell line ☐ HeLa ☐

**Catalog Number:** KO00484

Product Information	
Product Name	KHDRBS1 knockout cell line ( HeLa )
specification	1*10 <sup>6</sup>
Storage and transportation	Dry ice preservation/T25 live cell transportation.
Cell morphology	Epithelioid, adherent cell
Passage ratio	1:3~1:6
species	Human
Gene	KHDRBS1
Gene ID	10657
Build method	Electric rotation method / virus method
Mycoplasma testing	Negative
Cultivation system	90%DMEM+10% FBS
Parental Cell Line	HeLa
Quality Control	Genotype: KHDRBS1 knockout cell line ( HeLa ) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses, mycoplasma and other toxins.

Gene Information	
Gene Official Full Name	KH RNA binding domain containing, signal transduction associated 1 provided by HGNC
Also known as	p62; p68; Sam68
Gene Description	This gene encodes a member of the K homology domain-containing, RNA-binding, signal transduction-associated protein family. The encoded protein appears to have many functions and may be involved in a variety of cellular processes, including alternative splicing, cell cycle regulation, RNA 3'-end formation, tumorigenesis, and regulation of human immunodeficiency virus gene expression. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Dec 2012]
Expression	Ubiquitous expression in ovary (RPKM 44.4), endometrium (RPKM 41.0) and 25 other tissues See more
