

DTX3L Knockout cell line (HUVEC)

Catalog Number: KO01336

Product Information

Product Name	DTX3L Knockout cell line (HUVEC)
specification	1*10^6
Storage and transportation	Dry ice preservation/T25 live cell transportation.
Cell morphology	Epithelioid, adherent cell
Passage ratio	1 : 2-1 : 3
species	Human
Gene	DTX3L
Gene ID	151636
Build method	Electric rotation method / virus method
Mycoplasma testing	Negative
Cultivation system	Specialized medium for endothelial cells
Parental Cell Line	HUVEC
Quality Control	Genotype: DTX3L Knockout cell line (HUVEC) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses, mycoplasma and other toxins.

Gene Information

Gene Official Full Name	deltex E3 ubiquitin ligase 3Lprovided by HGNC
Also known as	BBAP; RNF143
Gene Description	Enables several functions, including STAT family protein binding activity; histone H4K91 ubiquitin ligase activity; and protein ADP-ribosyltransferase-substrate adaptor activity. Involved in several processes, including positive regulation of protein localization; protein ubiquitination; and regulation of macromolecule metabolic process. Located in several cellular components, including early endosome; lysosome; and nucleoplasm. Part of protein-containing complex. [provided by Alliance of Genome Resources, Apr 2025]
Expression	Ubiquitous expression in appendix (RPKM 14.2), spleen (RPKM 13.2) and 25 other tissues See more
