

APC Knockout cell line (HeLa)

Catalog Number: KO01395

Product Information	
Product Name	APC Knockout cell line (HeLa)
specification	-
Storage and transportation	Dry ice preservation/T25 live cell transportation.
Cell morphology	Epithelioid, adherent cell
Passage ratio	1:3~1:6
species	Human
Gene	APC
Gene ID	324
Build method	Electric rotation method / virus method
Mycoplasma testing	Negative
Cultivation system	90%DMEM+10% FBS
Parental Cell Line	HeLa
Quality Control	Genotype: APC Knockout cell line (HeLa) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses, mycoplasma and other toxins.

Gene Information	
Gene Official Full Name	APC regulator of WNT signaling pathwayprovided by HGNC
Also known as	GS; DP2; DP3; BTPS2; DESMD; DP2.5; PPP1R46
Gene Description	This gene encodes a tumor suppressor protein that acts as an antagonist of the Wnt signaling pathway. It is also involved in other processes including cell migration and adhesion, transcriptional activation, and apoptosis. Defects in this gene cause familial adenomatous polyposis (FAP), an autosomal dominant pre-malignant disease that usually progresses to malignancy. Mutations in the APC gene have been found to occur in most colorectal cancers, where disease-associated mutations tend to be clustered in a small region designated the mutation cluster region (MCR) and result in a truncated protein product. [provided by RefSeq, Jun 2022]
Expression	Ubiquitous expression in brain (RPKM 25.7), colon (RPKM 4.5) and 23 other tissues See more
