Gene Information	
Gene Official Full Name	cyclin dependent kinase 10provided by HGNC
Also known as	ALSAS; PISSLRE
Gene Description	The protein encoded by this gene belongs to the CDK subfamily of the Ser/Thr protein kinase family. The CDK subfamily members are highly similar to the gene products of <i>S. cerevisiae</i> cdc28, and <i>S. pombe</i> cdc2, and are known to be essential for cell cycle progression. This kinase has been shown to play a role in cellular proliferation and its function is limited to cell cycle G2-M phase. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, May 2009]
Expression	Ubiquitous expression in duodenum (RPKM 16.8), thyroid (RPKM 15.2) and 25 other tissues See more
