

TIPARP Knockout cell line (HeLa)

Catalog Number: KO01841

| Product Information | |
|----------------------------|---|
| Product Name | TIPARP Knockout cell line (HeLa) |
| specification | 1*10 ⁶ |
| Storage and transportation | Dry ice preservation/T25 live cell transportation. |
| Cell morphology | Epithelioid, adherent cell |
| Passage ratio | 1:3~1:6 |
| species | Human |
| Gene | TIPARP |
| Gene ID | 25976 |
| Build method | Electric rotation method / virus method |
| Mycoplasma testing | Negative |
| Cultivation system | 90%DMEM+10% FBS |
| Parental Cell Line | HeLa |
| Quality Control | Genotype: TIPARP Knockout cell line (HeLa) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses, mycoplasma and other toxins. |

| Gene Information | |
|-------------------------|--|
| Gene Official Full Name | TCDD inducible poly(ADP-ribose) polymerase provided by HGNC |
| Also known as | PARP7; ARTD14; pART14 |
| Gene Description | This gene encodes a member of the poly(ADP-ribose) polymerase superfamily. Studies of the mouse ortholog have shown that the encoded protein catalyzes histone poly(ADP-ribosylation) and may be involved in T-cell function. Alternative splicing results in multiple transcript variants. [provided by RefSeq, May 2010] |
| Expression | Ubiquitous expression in adrenal (RPKM 28.8), esophagus (RPKM 23.5) and 24 other tissues See more |
