

MARCHF6 Knockout cell line (HEK293)

Catalog Number: KO01963

Product Information	
Product Name	MARCHF6 Knockout cell line (HEK293)
specification	1*10 ⁶
Storage and transportation	Dry ice preservation/T25 live cell transportation.
Cell morphology	Epithelioid, adherent cell
Passage ratio	1:3~1:6
species	Human
Gene	MARCHF6
Gene ID	10299
Build method	Electric rotation method / virus method
Mycoplasma testing	Negative
Cultivation system	90%DMEM+10% FBS
Parental Cell Line	HEK293
Quality Control	Genotype: MARCHF6 Knockout cell line (HEK293) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses, mycoplasma and other toxins.

Gene Information	
Gene Official Full Name	membrane associated ring-CH-type finger 6provided by HGNC
Also known as	TEB4; DOA10; FAME3; FCMTE3; MARCH6; RNF176; MARCH-VI
Gene Description	This gene encodes a member of a family of membrane-associated E3 ubiquitin ligases containing RING-CH-type zinc finger motifs. Ubiquitination of type II deiodinase by the encoded protein is an important regulatory step in thyroid hormone signalling. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. [provided by RefSeq, Jul 2012]
Expression	Ubiquitous expression in brain (RPKM 18.9), bone marrow (RPKM 17.4) and 25 other tissues See more
