

CPXM1 Knockout cell line (HEK293)

Catalog Number: KO02375

Product Information	
Product Name	CPXM1 Knockout cell line (HEK293)
specification	1*10 ⁶
Storage and transportation	Dry ice preservation/T25 live cell transportation.
Cell morphology	Epithelioid, adherent cell
Passage ratio	1:3~1:6
species	Human
Gene	CPXM1
Gene ID	56265
Build method	Electric rotation method / virus method
Mycoplasma testing	Negative
Cultivation system	90%DMEM+10% FBS
Parental Cell Line	HEK293
Quality Control	Genotype: CPXM1 Knockout cell line (HEK293) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses, mycoplasma and other toxins.

Gene Information	
Gene Official Full Name	carboxypeptidase X, M14 family member 1provided by HGNC
Also known as	CPX1; CPXM
Gene Description	This gene likely encodes a member of the carboxypeptidase family of proteins. Cloning of a comparable locus in mouse indicates that the encoded protein contains a discoidin domain and a carboxypeptidase domain, but the protein appears to lack residues necessary for carboxypeptidase activity.[provided by RefSeq, May 2010]
Expression	Biased expression in endometrium (RPKM 64.0), gall bladder (RPKM 53.3) and 10 other tissues See more
