

## MAPK1IP1L Knockout cell line (HEK293)

Catalog Number: KO22174

| Product Information        |                                                                                                                                                                                |
|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Name               | MAPK1IP1L Knockout cell line (HEK293)                                                                                                                                          |
| specification              | 1*10 <sup>6</sup>                                                                                                                                                              |
| Storage and transportation | Dry ice preservation/T25 live cell transportation.                                                                                                                             |
| Cell morphology            | Epithelioid, adherent cell                                                                                                                                                     |
| Passage ratio              | 1:3~1:6                                                                                                                                                                        |
| species                    | Human                                                                                                                                                                          |
| Gene                       | MAPK1IP1L                                                                                                                                                                      |
| Gene ID                    | 93487                                                                                                                                                                          |
| Build method               | Electric rotation method / virus method                                                                                                                                        |
| Mycoplasma testing         | Negative                                                                                                                                                                       |
| Cultivation system         | 90%DMEM+10% FBS                                                                                                                                                                |
| Parental Cell Line         | HEK293                                                                                                                                                                         |
| Quality Control            | Genotype: MAPK1IP1L Knockout cell line (HEK293) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses, mycoplasma and other toxins. |

| Gene Information        |                                                                                                    |
|-------------------------|----------------------------------------------------------------------------------------------------|
| Gene Official Full Name | mitogen-activated protein kinase 1 interacting protein 1 like provided by HGNC                     |
| Also known as           | MISS; C14orf32; c14_5346                                                                           |
| Expression              | Ubiquitous expression in bone marrow (RPKM 15.9), kidney (RPKM 10.1) and 25 other tissues See more |
