

High Sensitivity DHAP Assay Kit (Fluorometric)

Synonym: High Sensitivity Dihydroxyacetone Phosphate Assay Kit (Fluorometric)

Catalog Number: EK0171

Product Size: 1 KT

Price: [Online Inquiry](#)

Product Information	
Storage Temperature	-20°C
Shipping Conditions	Gel ice pack.
Detection Method	Fluorometric.
Usage	Sufficient for 100 fluorometric tests.
Description	Dihydroxyacetone phosphate (DHAP) is a metabolic intermediate. It is involved in various pathways, such as glycolysis, glycerol metabolism, and fat metabolism. DHAP can be generated by the conversion of fructose-1,6-diphosphate. High Sensitivity DHAP Assay Kit (Fluorometric) can be used to measure DHAP in various biological samples, such as tissue and cell culture samples, serum, plasma, and other biological fluids.
