

Oxaloacetate Assay Kit

Catalog Number: EK0196

Product Size: 1 KT

Price: [Online Inquiry](#)

Product Information

Storage Temperature	-20°C
Shipping Conditions	Gel ice pack.
Detection Method	Colorimetric or fluorometric.
Usage	Sufficient for 100 colorimetric or fluorometric tests.
Description	Oxaloacetate (OAA) is an intermediate of the tricarboxylic acid cycle (TCA cycle) and gluconeogenesis. It is also involved in the urea cycle, amino acid synthesis, fatty acid synthesis, and the glyoxylate cycle. Oxaloacetate can be used to determine the concentration of OAA in various biological samples, such as tissues, cells, serum, and saliva.
