

Biotin Assay Kit (Colorimetric)

Catalog Number: EK0225

Product Size: 1 KT

Price: [Online Inquiry](#)

Product Information	
Storage Temperature	-20°C
Shipping Conditions	Gel ice pack.
Detection Method	Colorimetric
Usage	Sufficient for 200 colorimetric assays
Description	Biotin is a water-soluble vitamin. It can bind to streptavidin with high specificity. Biotinylation is commonly used to label a molecule with a biotin molecule for purification or detection applications. Biotin Assay Kit (Colorimetric) can be used to estimate the molar ratio of biotin to protein or quantitatively determine the concentration of biotin in a solution.
