

SRCIN1 Knockout cell line (HeLa)

Catalog Number: KO25945

Product Information	
Product Name	SRCIN1 Knockout cell line (HeLa)
specification	1*10 ⁶
Storage and transportation	Dry ice preservation/T25 live cell transportation.
Cell morphology	Epithelioid, adherent cell
Passage ratio	1:3~1:6
species	Human
Gene	SRCIN1
Gene ID	80725
Build method	Electric rotation method / virus method
Mycoplasma testing	Negative
Cultivation system	90%DMEM+10% FBS
Parental Cell Line	HeLa
Quality Control	Genotype: SRCIN1 Knockout cell line (HeLa) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses, mycoplasma and other toxins.

Gene Information	
Gene Official Full Name	SRC kinase signaling inhibitor 1 provided by HGNC
Also known as	P140; SNIP
Gene Description	Enables protein kinase binding activity. Involved in several processes, including postsynaptic actin cytoskeleton organization; regulation of protein tyrosine kinase activity; and substrate adhesion-dependent cell spreading. Located in actin cytoskeleton and cytoplasm. Is active in glutamatergic synapse. [provided by Alliance of Genome Resources, Apr 2025]
Expression	Biased expression in brain (RPKM 9.1), salivary gland (RPKM 1.2) and 2 other tissues See more
