

## FAM149A Knockout cell line (HCT 116)

**Catalog Number:** KO28713

| Product Information        |                                                                                                                                                                               |

| Build method               | Electric rotation method / virus method                                                                                                                                       |
| Mycoplasma testing         | Negative                                                                                                                                                                      |
| Cultivation system         | 90%McCOYs 5A+10% FBS                                                                                                                                                          |
| Parental Cell Line         | HCT 116                                                                                                                                                                       |
| Quality Control            | Genotype: FAM149A Knockout cell line (HCT 116) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses, mycoplasma and other toxins. |

| Gene Information        |                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------|
| Gene Official Full Name | family with sequence similarity 149 member A provided by HGNC                         |
| Also known as           | MST119; MSTP119                                                                       |
| Expression              | Broad expression in kidney (RPKM 4.2), liver (RPKM 2.3) and 22 other tissues See more |
