Gene Information	
Gene Official Full Name	ATP binding cassette subfamily B member 6 (LAN blood group)provided by HGNC
Also known as	ABC; LAN; PRP; umat; MTABC3
Gene Description	This gene encodes a member of the ATP-binding cassette (ABC) transporter superfamily. ABC proteins transport various molecules across extra- and intra-cellular membranes. This protein is a member of the heavy metal importer subfamily and plays a role in porphyrin transport. This gene is the molecular basis of the Langereis (Lan) blood group antigen and mutations in this gene underlie familial pseudohyperkalemia and dyschromatosis universalis hereditaria. Expression	Ubiquitous expression in testis (RPKM 14.1), ovary (RPKM 9.7) and 25 other tissues See more
