

TNFRSF10A Knockout cell line (HeLa)

Catalog Number: KO33865

Product Information

Product Name	TNFRSF10A Knockout cell line (HeLa)
specification	1*10 ⁶
Storage and transportation	Dry ice preservation/T25 live cell transportation.
Cell morphology	Epithelioid, adherent cell
Passage ratio	1:3~1:6
species	Human
Gene	TNFRSF10A
Gene ID	8797
Build method	Electric rotation method / virus method
Mycoplasma testing	Negative
Cultivation system	90%DMEM+10% FBS
Parental Cell Line	HeLa
Quality Control	Genotype: TNFRSF10A Knockout cell line (HeLa) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses, mycoplasma and other toxins.

Gene Information

Gene Official Full Name	TNF receptor superfamily member 10a provided by HGNC
Also known as	DR4; APO2; CD261; TRAILR1; TRAILR-1
Gene Description	The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor is activated by tumor necrosis factor-related apoptosis inducing ligand (TNFSF10/TRAIL), and thus transduces cell death signal and induces cell apoptosis. Studies with FADD-deficient mice suggested that FADD, a death domain containing adaptor protein, is required for the apoptosis mediated by this protein. [provided by RefSeq, Jul 2008]
Expression	Ubiquitous expression in lymph node (RPKM 4.9), appendix (RPKM 4.2) and 24 other tissues See more
