

## ZNF146 Knockout cell line (HeLa)

**Catalog Number:** KO34592

| Product Information        |                                                                                                                                                                          |

| Product Name               | ZNF146 Knockout cell line (HeLa)                                                                                                                                         |
| specification              | 1*10^6                                                                                                                                                                   |
| Storage and transportation | Dry ice preservation/T25 live cell transportation.                                                                                                                       |
| Cell morphology            | Epithelioid, adherent cell                                                                                                                                               |
| Passage ratio              | 1:3~1:6                                                                                                                                                                  |
| species                    | Human                                                                                                                                                                    |
| Gene                       | ZNF146                                                                                                                                                                   |
| Gene ID                    | 7705                                                                                                                                                                     |
| Build method               | Electric rotation method / virus method                                                                                                                                  |
| Mycoplasma testing         | Negative                                                                                                                                                                 |
| Cultivation system         | 90%DMEM+10% FBS                                                                                                                                                          |
| Parental Cell Line         | HeLa                                                                                                                                                                     |
| Quality Control            | Genotype: ZNF146 Knockout cell line (HeLa) >95% viability before freezing. All cells were tested and found to be free of bacterial, viruses,mycoplasma and other toxins. |

| Gene Information        |                                                                                                                                                                                                                                                                                                                                                    |

| Gene Official Full Name | zinc finger protein 146provided by HGNC                                                                                                                                                                                                                                                                                                            |
| Also known as           | OZF                                                                                                                                                                                                                                                                                                                                                |
| Gene Description        | Predicted to enable DNA-binding transcription factor activity, RNA polymerase II-specific and RNA polymerase II cis-regulatory region sequence-specific DNA binding activity. Predicted to be involved in regulation of transcription by RNA polymerase II. Located in cytosol and nucleolus. [provided by Alliance of Genome Resources, Apr 2025] |
| Expression              | Ubiquitous expression in thyroid (RPKM 20.8), endometrium (RPKM 19.9) and 25 other tissues See more                                                                                                                                                                                                                                                |
