Gene Information	
Gene Official Full Name	membrane associated ring-CH-type finger 6provided by HGNC
Also known as	TEB4; DOA10; FAME3; FCMTE3; MARCH6; RNF176; MARCH-VI
Gene Description	This gene encodes a member of a family of membrane-associated E3 ubiquitin ligases containing RING-CH-type zinc finger motifs. Ubiquitination of type II deiodinase by the encoded protein is an important regulatory step in thyroid hormone signalling. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. [provided by RefSeq, Jul 2012]
Expression	Ubiquitous expression in brain (RPKM 18.9), bone marrow (RPKM 17.4) and 25 other tissues See more
