Gene Information	
Gene Official Full Name	bone marrow stromal cell antigen 1 provided by HGNC
Also known as	CD157; cADPR2
Gene Description	Bone marrow stromal cell antigen-1 is a stromal cell line-derived glycosylphosphatidylinositol-anchored molecule that facilitates pre-B-cell growth. The deduced amino acid sequence exhibits 33% similarity with CD38. BST1 expression is enhanced in bone marrow stromal cell lines derived from patients with rheumatoid arthritis. The polyclonal B-cell abnormalities in rheumatoid arthritis may be, at least in part, attributed to BST1 overexpression in the stromal cell population. [provided by RefSeq, Jul 2008]
Expression	Broad expression in bone marrow (RPKM 14.1), duodenum (RPKM 6.3) and 23 other tissues See more
